

KBIS Recap: Where Ideas Met Innovation

A big thank you to everyone who visited us at KBIS 2025. Your feedback, insights, and enthusiasm drive us to continuously improve and create solutions that truly meet your needs.

It's always a great opportunity to not only showcase new features and products to our existing customers but also to introduce unmatched solutions to those who can benefit from them.

Aside from MeasureSquare Stone & Tile, MeasureSquare 8 Commercial, and MeasureSquare Mobile, one of our buzziest products at KBIS was **our LiDAR-enabled app, RoomScanner**. With any iPhone Pro, you can open your phone camera and scan any interior space to generate a 3D floorplan that can then be imported into MeasureSquare Mobile. You can find the **[RoomScanner app in the Apple App Store](#)**.

If you didn't get the chance to attend this year's KBIS, check out the latest updates to MeasureSquare Mobile by clicking the button below.

From One Day to A Few Clicks: How CKF Sped Up Estimating

Sadie Anderson, VP of Marketing & Design at CKF, was frustrated with her team's day-long process for calculating slab utilization—until they discovered MeasureSquare Stone & Tile.

"Before [Measure Square], our commercial team had no way of knowing how many slabs they were going to need for a job. It was a very manual process to try to find out what our slab utilization was. We took what was a days-long process of trying to nest slabs in AutoCAD down to literally a couple clicks of a button. Our slab utilization is done in seconds now," Anderson says.

With Measure Square, the CKF team was able to prepare more estimates, do more business, and take better care of their clients. To hear more on how Measure Square helped CKF, watch the full customer success story.
